

## Program Outcomes

Program outcomes are used as an objective measurement tool to assist in understanding how well the program is functioning. It is our mission to provide meaningful learning and prepare qualified professionals who will provide quality healthcare to the community. Based on the achievements of our students/graduates over the past 5 years, we are confident that the program is successful. The objective measures used to assess our outcomes are; certification pass rate, program completion rate, and employment rate within six months post graduation.

### St. Vincent's Graduates

	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u>	<u>Average</u>
